# PART I

## GETTING STARTED

Master the fundamentals before your journey begins

PART I

# BEGINNER'S STRATEGY GUIDE

## Your First Five Duels

You begin in **Balamb Garden** with a starter deck of Level 1 cards. Don't worry — Balamb uses the **Open** rule, which means you can see your opponent's hand. This is your training ground.

**Duel 1-2: Garden Students.** These opponents use weak Level 1 decks. Focus on learning card placement: put low values against walls, strong values facing the centre.

**Duel 3-4: Garden Instructors.** Slightly tougher with Level 1-2 cards. Start thinking about which cards to save for later turns.

**Duel 5: Fire Cavern.** Your first dungeon! Beat the opponent on each floor, then face the boss. Win to progress the story.

> TIP
>
> Always place cards with weak edges against the board walls. A card with values 1-5-1-7 should go on the left wall with the 1's protected by the edge.

## Understanding Card Values

Each card has four values (Top, Right, Bottom, Left) ranging from 1 to A (10). When you place a card next to an opponent's card, compare the touching edges:

- **Your value > their value**: You capture their card (it flips to your colour)
- **Your value ≤ their value**: Nothing happens on that edge

> NOTE
>
> The corner positions are the strongest because only two edges are exposed to attack. Place your best cards in corners when possible.

## Building Your First Competitive Deck

As you win cards from early opponents, start upgrading your deck:

1. **Replace Level 1 cards** with Level 2-3 cards as you earn them
2. **Look for corner cards** — cards with two adjacent high values (e.g., Top=7, Right=6)
3. **Keep one balanced card** for the centre position (no weak edges)
4. **Visit card shops** to fill gaps in your collection

PART I

# Advanced Mechanics Deep Dive

## Mastering Same & Plus

The **Same** and **Plus** rules are the most powerful mechanics in Triple Triad. Understanding them is the difference between winning and losing in mid-to-late game regions.

**Same** triggers when two or more of your placed card's edges match the touching values of adjacent cards. Both matched cards are captured, regardless of which value is higher. This means even a weak card can capture a strong one!

**Plus** triggers when two or more pairs of touching edges share the same sum. For example, if your card's Right (3) touches an opponent's Left (5) = sum of 8, and your card's Bottom (6) touches an opponent's Top (2) = also 8, Plus activates.

> WARNING
>
> In Centra, Same + Plus + **Combo** are all active simultaneously. A single Same/Plus capture can cascade through the entire board. Always think 2-3 moves ahead.

## Elemental Board Control

When the Elemental rule is active, 1-3 board spaces display element icons. Placing a card whose element matches the space gives **+1 to all four values**. A mismatched element gives **-1 to all values**. No element = no effect.

**Strategy:** In Elemental regions (FH, Esthar), build decks with diverse elements. A Level 5 Fire card on a Fire space becomes effectively a Level 6+ card. Conversely, placing a Fire card on an Ice space weakens it dramatically.

## Rule Manipulation (Queen of Cards)

The **Queen of Cards** appears in select locations and offers two services:

- **Spread a rule** (1,000 Gil) — Introduce a rule from another region
- **Abolish a rule** (500 Gil) — Remove a local rule you find troublesome

> PRO TIP
>
> Before entering Esthar, consider abolishing the Random rule to maintain control over your hand. The 500 Gil cost is a tiny price compared to losing your best cards under the All trade rule.

# BALAMB

| SPECIAL RULES | TRADE RULE | UNLOCK |
|---|---|---|
| Open | One | Available from start |

Home to Balamb Garden and the coastal town of Dollet. Open rules let you see your opponent's hand — a fair start for new players.

## Strategy

With Open rules, you can see everything. Focus on counter-play — wait for your opponent to commit, then exploit their weak edges. Save your strongest card for the final placement.

# GALBADIA

| SPECIAL RULES | TRADE RULE | UNLOCK |
|---|---|---|
| Same | One | Chapter 3 |

The militaristic Galbadian continent. The Same rule makes positioning crucial — one wrong move and your cards get chain-captured.

## Strategy

Same rule rewards setting up matching values adjacent to multiple opponent cards. Place cards that create Same opportunities on your next turn. Be careful — the AI uses Same too.

# Fisherman's Horizon

| SPECIAL RULES | TRADE RULE | UNLOCK |
|---|---|---|
| Elemental, Sudden Death | Diff | Chapter 7 |

A pacifist settlement on the transcontinental bridge. Sudden Death means draws never end, and the Diff trade rule means you win or lose cards proportional to your score.

## Strategy

Elemental spaces can make or break a match. Build a deck with diverse elements. Sudden Death means you must win decisively — draws just extend the game.

# TRABIA

| SPECIAL RULES | TRADE RULE | UNLOCK |
|---|---|---|
| Random, Plus | Diff | Chapter 9 |

The frozen northern continent. The Plus rule rewards mathematical thinking, but Random hands make it a gamble. Diff trading means bigger wins — and bigger losses.

## Strategy

Random hands are unpredictable, so build a deep collection of strong cards. Plus rule rewards arithmetic thinking — memorise common sums (8, 9, 10) and position accordingly.

# CENTRA

| SPECIAL RULES | TRADE RULE | UNLOCK |
|---|---|---|
| Same, Plus, Combo | Direct | Chapter 11 |

The ruined southern continent, devastated by the Lunar Cry. Combo chains captures from Same and Plus, and Direct trade means you swap every card you captured.

## Strategy

The deadliest region. Same + Plus + Combo means a single trigger can cascade across the board. Think 3 moves ahead. Direct trading means you keep what you capture — aggressive play pays off.

# ESTHAR

| SPECIAL RULES | TRADE RULE | UNLOCK |
|---|---|---|
| Elemental, Same Wall, Random | All | Chapter 12 |

The technologically advanced Esthar continent. Same Wall makes edges deadly, Random shuffles your hand, and the All trade rule means the winner takes everything.

## Strategy

Same Wall turns board edges into A-value walls. Cards in corners and edges are much stronger. Random hands + All trading makes this high-risk, high-reward. Only bring expendable cards until you are confident.

# PART VI

## TIPS & SECRETS

### Wisdom from the masters of Triple Triad

# Expert Strategies & Hidden Mechanics

## Best Gil Farming Spots

- **Early game:** Balamb Garden students (75-100 Gil each, fast matches)
- **Mid game:** Galbadia Garden instructors (200-250 Gil, Tier 2)
- **Late game:** Esthar soldiers (500-800 Gil, Tier 4)
- **Endgame:** Tournament victories (1000+ Gil prizes)

## Fastest Card Collection Route

1. Clear all Balamb NPCs for a solid Level 1-2 foundation
2. Win the Balamb Garden Tournament for guaranteed rare cards
3. Push to Galbadia for Level 3-4 cards from Deling City
4. Complete side quests — they reward specific rare cards
5. Farm Centra dungeons for Level 5-6 drops
6. Challenge Esthar endgame NPCs for Level 7-10 legendaries

## Rule Manipulation Strategies

- **Abolish Random** in Esthar before attempting the All trade rule region
- **Spread Open** to other regions for easier matches everywhere
- **Abolish Combo** in Centra if you find chain captures too unpredictable
- Use the Queen of Cards strategically — 500 Gil to remove a rule is always worth it

## Best Decks for Each Region

| REGION | STRATEGY | KEY CARDS |
|---|---|---|
| Balamb | High-value corners | Strong Top+Right or Top+Left combos |
| Galbadia | Same setup cards | Cards with matching edge pairs (5-5, 6-6) |
| FH | Elemental matching | Cards with elements matching common board types |
| Trabia | Deep collection | Many strong cards (Random picks from all) |
| Centra | Anti-combo defence | Cards with no matching edges to avoid triggering opponent Same |
| Esthar | Wall-huggers | Cards with A-value edges for Same Wall exploitation |

## Hidden Mechanics

- **Turn order matters**: Going second gives you the last placement and a +1 score bonus
- **Same Wall corners**: A card with A-A on two wall-touching edges auto-triggers Same with just one adjacent match
- **Combo depth**: There is no limit to chain length — a single Combo can flip all 8 opponent cards theoretically
- **Element stacking**: A Level 8 card with matching element on an elemental space effectively becomes Level 9+
